

Subject index

- Acid-base balance**
 - isohydric regulation of plasma potassium by bicarbonate, 333
 - lithium-induced impairment of urine acidification, 344
- Acid excretion**
 - transport processes in urinary acidification, 172
 - bicarbonate reabsorption in chronic renal failure and, 481
- Acidification**
 - of urine, transport processes in, 172
- Acidosis**
 - lithium-induced, 344
- Acute renal failure**
 - cardio-pulmonary response to (abstr.), 380
 - clinical spectrum in South African blacks (abstr.), 379
 - diagnosis by gamma-camera using RT and RH (abstr.), 525
- Adenylate cyclase**
 - functional segmentation of rabbit distal tubule by micro-determination of, 264
- Adrenal function**
 - in uremic patients undergoing periodic hemodialysis (abstr.), 534
- Albumin**
 - distribution in the rat glomerulus, 36
- Aldosterone**
 - effect of angiotensin II blockade on, in cirrhosis, 511
 - secretion and PRA, blood volume and potassium in chronic uremia (abstr.), 526
- Allografts**
 - risk factors and cancer in recipients of (abstr.), 378
- Ammonia**
 - production, effect of uremic toxins on (abstr.), 533
 - urinary, sources of precursors of (abstr.), 527
- Analgesic abuse**
 - after transplantation (abstr.), 375
- Anaphylactoid purpura**
 - vascular IgA deposits in skin of patients with renal disease, 424
- Angiotensin analogue**
 - in angiotensin II blockade in cirrhosis, 511
- Angiotensin II**
 - blockade of, effect on blood pressure, renin and aldosterone in cirrhosis, 511
- Antibiotics**
 - control of neurotoxicity of in hemodialysis (abstr.), 532
 - penetration into renal cortex and medulla (abstr.), 452
- Antidiuretic hormone**
 - and water transport, 223
- Anuria**
 - reversible syndrome in chronic disease (abstr.), 525
 - tubuloglomerular feedback in early distal tubule perfusion with deionized sera (abstr.), 454
- Ascending thick limb**
 - morphology of the limb of Henle, 8
- Bartter's syndrome**
 - with hyperplasia of renomedullary cells, 302
 - indomethacin treatment of (abstr.), 449
- Basic principles**
 - of transport across epithelia, 65
- Benzolamide**
 - potassium secretion by the descending limb of pars recta of the juxtamedullary nephron, 323
- Bicarbonate**
 - intraluminal, effect on fluid absorption by proximal tubule, 457
 - isohydric regulation of plasma potassium by, 333
- Bicarbonate reabsorption**
 - in chronic renal failure, 481
 - lithium-induced impairment of urine acidification, 344
- Bicarbonate transport**
 - proximal, PTH effects on, 501
- Blood pressure**
 - effect of angiotensin II blockade on, in cirrhosis, 511
- Blood volume**
 - hypertension in terminal renal failure, 294
- Bone**
 - biopsies and X rays in uremic osteodystrophy (abstr.), 520
 - biopsy, quantitative study of (abstr.), 522
 - biopsy studies in uremic osteodystrophy (abstr.), 520
 - densitometry in study of uremic osteopathy (abstr.), 529
 - evolutionary aspects of renal osteodystrophy in periodic hemodialysis patients (abstr.), 524
 - in skeletal resistance to PTH in uremia, and vitamin D, 467
- Bone histology**
 - in incipient renal failure, 355
- Bradykinin-induced diuresis**
 - after prostaglandins synthetase inhibition (abstr.), 453
- Calcification**
 - in chronic hemodialysis patient with cardiac pace-maker (abstr.), 521
- Calcitonin**
 - concentration variation in acute renal failure (abstr.), 521
 - increased, in chronic and early acute renal failure (abstr.), 520
 - role of in plasma phosphate control (abstr.), 527
- Calcium**
 - body, neutron activation measurement (abstr.), 524
 - calcemic action of PTH in uremia, role of vitamin D in skeletal resistance to, 467
 - concentration variation in acute renal failure (abstr.), 521
 - effect of dihydrotachysterol on defective intestinal absorption of (abstr.), 521
 - heterogeneous regulation in hemodialyzed patients (abstr.), 522

Subject Index

- hypercalcemia in patients on chronic hemodialysis (abstr.), 521
- intestinal absorption tests compared, radiotracer technique (abstr.), 522
- ionized, evaluation (abstr.), 523
- metabolism in azotemia (abstr.), 452
- Cell shape
 - in the rabbit proximal nephron, 385
- Cell volume
 - cellular aspects of renal sodium transport and regulation of, 103
- Chloride
 - intraluminal, effect on fluid absorption by proximal tubule, 457
 - tubular transport of, 189
- Cholecalciferol
 - cytosol binding of in duodenum (abstr.), 523
- Chronic renal failure
 - bicarbonate reabsorption in, 481
 - bone histology in, 355
 - increased permeability of blood-brain barrier to phenylglutamine hydrochloride in (abstr.), 381
 - ultrasonic assessment of left ventricular function in (abstr.), 380
- Cirrhosis
 - and Au antigen in chronic dialysis patients (abstr.), 531
 - blockade of angiotensin II in, 511
 - pathophysiological aspects of renal failure in (abstr.), 528
 - reinfusion of concentrated ascitic fluid in (abstr.), 530
 - renal blood flow measurement in, with xenon (abstr.), 534
- Coagulation
 - intravascular, in reversible uremia (abstr.), 531
- Colloidal carbon
 - uptake and transport in glomerular mesangium, 395
- Compensatory adaptation
 - of renal function, adrenal or parathyroid role in (abstr.), 451
- Compensatory renal hypertrophy
 - morphological approach to (abstr.), 453
- Complement activation
 - in membranoproliferative glomerulonephritis, 46
 - vascular IgA deposits in skin of patients with renal disease, 424
- Concentrating mechanism
 - in the renal medulla, 214
- Congenital nephrotic syndrome
 - chemical properties of glomerular basement membrane (abstr.), 450
- Conn's syndrome
 - clinicopathological case study (abstr.), 378
- Corticosteroids
 - treatment of allograft rejection, 351
- Costs
 - of dialysis, 286
- Crescents
 - glomerulonephritis with, in reversible renal failure (abstr.) 534
- Cystinosis
 - management of uremia in (abstr.), 528
- "Dense deposit disease"
 - recurrence after transplantation, 439
- Descending limb of Henle's loop
 - potassium secretion by, 323
- Diabetes insipidus
 - results of DDAVP-test and inheritance in two family groups (abstr.), 526
- Diagnosis
 - problems in chronic renal failure (abstr.), 531
- Dialysis
 - and adrenal cortical function (abstr.), 534
 - analysis and outcome of patients trained for home hemodialysis, 363
 - costs of, 286
 - determination of gastrin in chronic uremia during (abstr.), 533
 - in the elderly (abstr.), 528; (abstr.), 525
 - extracellular fluid volume in patients on, 57
 - glycolipid metabolism during and after (abstr.), 530
 - and high-risk patients (abstr.), 533
 - high sodium content and blood volume changes (abstr.), 532
 - high sodium dialysate in repeated short dialyses (abstr.), 529
 - with a Millipore filter, 54
 - pharmacokinetics of gentamicin during, 430
 - renal function improvement by patients undergoing (abstr.), 532
- Digoxin
 - high concentrations of in hemodialysis patients (abstr.), 528
- Dihydrotachysterol
 - effect on defective intestinal calcium absorption (abstr.), 521
- Distal transport
 - of solute and water, 198
- Distal tubule
 - functional segmentation of, 264
- Diuretics
 - tubular chloride transport and the mode of action of, 189
- Dopamine
 - effects on renal function (abstr.), 525
 - in role of efferent arteriole in glomerular hemodynamics, 475
- Duodenum
 - cytosol binding of 25-OHD₃ and 1,25-OHD₃ in (abstr.), 523
- Editorial
 - sites of enzyme activity along the nephron, 233
- Efferent arteriole
 - in glomerular hemodynamics, 475
- Electrical phenomena
 - in the nephron, 88
- Enzymes
 - functional segmentation of rabbit distal tubule by microdetermination of adenylate cyclase, 264
 - sites of activity along the nephron, 233
- Epidemiology
 - screening of school children for kidney disease (abstr.), 527
- Epinephrine
 - in role of efferent arteriole in glomerular hemodynamics, 475
- Epithelial transport
 - of solute, 65

Subject Index

- Erythropoietin
 - administration in renal insufficiency (abstr.), 529
- Experimental renal disease
 - effect of pyelonephritis on renal function, 23
- Extracellular fluid volume
 - bicarbonate reabsorption in chronic renal failure and, 481
 - in patients on maintenance hemodialysis, 57
- Fanconi syndrome
 - glomerular lesions and genetic feature of (abstr.), 529
- Filter
 - Millipore, in peritoneal dialysis, 54
- Fistula
 - for hemodialysis, complications with (abstr.), 531
- Fluid absorption
 - by proximal tubule, effect of intraluminal bicarbonate and chloride on, 457
- Fluoride
 - serum concentrations of, in renal insufficiency (abstr.), 453
- Furosemide
 - potassium secretion by the descending limb of pars recta of the juxtamedullary nephron, 323
- Gammagraphy
 - total body, in uremic patients (abstr.), 527
- Gastrin
 - assessment in hypercalcemic patients on chronic hemodialysis (abstr.), 521
 - determination in chronic uremia during hemodialysis (abstr.), 533
 - role of in plasma phosphate control (abstr.), 527
- Genetics
 - of renal transport, 149
- Gentamicin
 - pharmacokinetics of, during peritoneal dialysis, 430
- Glomerular cell types
 - grown in cultures (abstr.), 380
- Glomerular deposits
 - identification methods compared (abstr.), 381
- Glomerular function
 - hemodynamic factors in, 36
- Glomerular hemodynamics
 - efferent arteriole in, 475
- Glomerular ultrastructure
 - method for the isolation of preserved glomeruli, 278
- Glomeruli
 - ultrastructurally preserved, method for isolation of, 278
- Glomerulonephritis
 - complement activation in, 46
 - with crescents in reversible renal failure (abstr.), 534
 - effect of nephrotoxic serum on renal sodium transport, 243
 - and infected ventriculo-atrial shunt (abstr.), 534
 - lysosomal enzymes, role of, in (abstr.), 381
 - mesangial IgA deposits in (abstr.), 526
 - pathogenesis and approaches to therapy of, 1
 - and polyarteritis nodosa in a child (abstr.), 375
 - recurrence after transplantation, 439
 - reversibility after immunosuppressive therapy (abstr.), 451
 - vascular IgA deposits in skin of patients with, 424
- Glomerulopathy
 - associated with renal infarction, 407
- Glomerulus
 - ultrastructural reconstructions on human (abstr.), 380
- Glucosuria
 - familial, α and β glycogen particles in proximal tubular cells in (abstr.), 533
- Glycogen
 - particles in proximal tubular cells in familial renal glucosuria (abstr.), 533
- Glycolipids
 - metabolism of during and after dialysis (abstr.), 530
- Hemodialysis
 - and adrenal cortical function (abstr.), 534
 - analysis and outcome of patients trained for home treatment, 363
 - costs of, 286
 - in the elderly (abstr.), 525
 - extracellular fluid volume in patients on, 57
 - gastrin determination in chronic uremia during (abstr.), 533
 - glycolipid metabolism during and after (abstr.), 530
 - and high blood digoxin concentrations (abstr.), 528
 - high sodium content and blood volume changes (abstr.), 532
 - high sodium dialysate in repeated short dialyses (abstr.), 529
 - patient response to graded exercise (abstr.), 377
 - and renal function improvement in uremia (abstr.), 532
 - volume overload and hypertension in exercise testing of patients on (abstr.), 377
- Hemolytic-uremic syndrome
 - childhood, dialysis and heparin therapy in (abstr.), 529
- Hemorrhagic hypotension
 - in role of efferent arteriole in glomerular hemodynamics, 475
- Heparin
 - therapy in childhood hemolytic-uremic syndrome (abstr.), 529
- Henle
 - morphology of the limb of, 8
- Hollow fiber kidney
 - reuse of CDK model 5 (abstr.), 452
- Home dialysis
 - analysis and outcome of 1063 patients trained for, 363
 - costs of, 286
- Home dialysis training
 - analysis and outcome of 1063 patients, 363
- Hydroxycholecalciferol
 - cytosol binding of in duodenum (abstr.), 523
- Hyperkalemia
 - isohydric regulation of potassium by bicarbonate, 333
 - missed diagnosis on electrocardiogram (abstr.), 379
- Hyperlipidemia
 - in nephrotic syndrome of blacks (abstr.), 376
 - in transplant patients (abstr.), 376
- Hyperparathyroidism
 - normocalcemic primary, and acute renal failure (abstr.), 380
 - parathyroidectomy for, in chronic renal insufficiency (abstr.), 521
 - study by thyroid lymphography (abstr.), 523
 - suppression by vitamin D₂ in patients on RDT (abstr.), 526
 - in uremia, and beta-adrenergic system at cardiac level, interaction of (abstr.), 521

Subject Index

- Hypertension**
dialysis-resistant and propranolol use (abstr.), 530
diazoxide treatment of (abstr.), 450
K balance studies during chlorthalidone administration (abstr.), 449
pathogenesis of in early stage kidney disease (abstr.), 451
renal hemodynamics in (abstr.), 453
salt-induced, enhanced natriuresis in prehypertensive stage (abstr.), 452
in terminal renal failure, 294
in urban black females (abstr.), 377
- Hyperuricemia**
dietary-induced, renal function in, 489
- Hypokalemia**
isohydric regulation of potassium by bicarbonate, 333
- IgA**
mesangial deposits in glomerulonephritis (abstr.), 526
- IgA nephropathy**
vascular deposits in skin of patients with renal disease, 424
- IgM**
phagocytic activity and vascular permeability effects on clearance and localization of (abstr.), 449
- Indomethacin**
treatment of Bartter's syndrome with hyperplasia of renomedullary cells, 302
- Infarction**
pathogenesis of glomerulopathy associated with, 407
- Intercellular channels**
in rabbit proximal nephron, 385
- Interstitial nephritis**
and chronic renal failure in patients with methylmalonic acidemia (abstr.), 534
- Intraluminal obstruction**
in dietary-induced hyperuricemia, 489
- Introduction**
to the Symposium on Membrane Transport in the Kidney, 63
- Isolated glomeruli**
method for preserving, 278
- Isoniazid**
pharmacodynamics of, in chronic renal failure (abstr.), 376
- Isoproterenol**
functional segmentation of rabbit distal tubule by microdetermination of adenylate cyclase, 264
- Juxtaglomerular hyperplasia**
Bartter's syndrome and, 302
- Juxtamedullary nephron**
potassium secretion by, 323
- Lesch-Nyhan syndrome**
hyperuricemic nephropathy in infancy (abstr.), 530
- Limb of Henle**
morphology of, 8
- Lithium**
induced impairment of urine acidification, 344
- Ludwig's theory**
of tubular reabsorption, physical factors in, 313
- Lupus erythematosus**
reversibility of uremia associated with (abstr.), 533
steroid and cyclophosphamide treatment of (abstr.), 379
- Lymphoceles**
in renal homograft recipients (abstr.), 378
- Lymphocytes**
T and B, determination in transplantation patients (abstr.), 526
- Medullary cystic disease**
Tamm-Horsfall protein in (abstr.), 450
- Membranoproliferative glomerulonephritis**
classical complement pathway activation in, 46
pathogenesis and therapy of, 1
prognosis of clinical and histological indexes in (abstr.), 525
- Mesangiocapillary glomerulonephritis**
recurrence after transplantation, 439
- Mesangium**
vascular IgA deposits in skin of patients with renal disease, 424
glomerular, uptake and transport of colloidal carbon, 395
- Micropuncture**
effect of nephrotoxic serum on renal sodium transport, 243
in parathyroid hormone effects on proximal bicarbonate transport, 501
renal function during dietary-induced hyperuricemia, 489
- Millipore filter**
use in peritoneal dialysis, 54
- Neonates**
renal function, premature and term (abstr.), 452
- Nephritic factor**
complement activation in glomerulonephritis, 46
- Nephrogenic diabetes insipidus**
results of DDAVP-test and inheritance in two family groups (abstr.), 526
- Nephrotic syndrome**
childhood steroid-sensitive, HL-A typing and atopic features in (abstr.), 379
congenital and infantile (abstr.), 528
light microscopic studies of (abstr.), 376
in very young infants (abstr.), 528
- Nephrotoxicity**
in drug-induced reversible renal failure (abstr.), 529
- Nephrotoxic serum**
effect on renal sodium transport, 243
- Neutron activation**
method of body calcium measurement (abstr.), 524
- Neutrophil function**
in chronic renal failure and after transplantation (abstr.), 378
- Norepinephrine**
in role of efferent arteriole in glomerular hemodynamics, 475
- Obstructive jaundice**
saralasin and phenoxybenzamine effects on renal function in (abstr.), 375
- Obstructive uropathy**
reversibility of in uremia (abstr.), 531
review of 17 cases (abstr.), 377
- Osteodystrophy**
bone densitometry in study of (abstr.), 529

Subject Index

- effects of dialysis and transplantation on by serial bone biopsy studies (abstr.), 520
- evolutionary aspects of in periodic hemodialysis patients (abstr.), 524
- neutron activation of calcium in (abstr.), 524
- patients on RDT, evaluation of vitamin D therapy in (abstr.), 520
- quantitative study of bone biopsy in (abstr.), 522
- short-term effect of vitamin D₃ treatment in (abstr.), 524
- treatment with high doses of vitamin D₃ (abstr.), 523
- treatment by 25-hydroxycholecalciferol (abstr.), 522
- Organic solutes
 - renal tubular mechanisms of transport of, 134
- Osteodystrophy
 - in incipient renal failure, 355
- Oxalate
 - changes in hemodialysis patients treated with succinimide (abstr.), 532
- Oxonic acid
 - in dietary-induced hyperuricemia, 489
- Pace-maker
 - nodal calcifications in chronic hemodialysis patient with (abstr.), 521
- Parathyroid hormone
 - assessment in hypercalcemic patients on chronic hemodialysis (abstr.), 521
 - bicarbonate reabsorption in chronic renal failure and, 481
 - concentration variation in acute renal failure (abstr.), 521
 - effects on proximal bicarbonate transport, 501
 - functional segmentation of rabbit distal tubule by microdetermination of adenylate cyclase, 264
 - secretion of *in vivo* and microtubule disrupters (abstr.), 520
 - skeletal resistance to calcemic action of, role of vitamin D in, 467
